To
The Director,
Regional Institute of Medical Sciences,
Imphal, Manipur.

Subject: Introduction of **NOCOSPRAY** fogging machine, a **proprietary** item from
OXY'PHARM, France and its Rate quotation.

Dear Sir,

We, Capital Agency, an ISO 9001:2008 certified leading sales & service provider of medical equipment and consumable, introducing "NOCOSPRAY" fogging machine, a proprietary machine from **OXY'PHARM, France** through its India distributor "**UNO Hospital Solutions**", **Sector 12 Panchkula, Haryana** to your esteem Institution.

Please find the features of the machine and our offer rate for the same.

1. It has a heating and ionising turbine - The turbine heats the air at 37 Degree C and ionises the air, then takes few droplets of Nocolyse (the disinfectant) and throws at a very high speed of 80 m/s. This ionised particles travels to every corner of the room and it sticks to all the surfaces thereby disinfecting them.

The normal fogging machines are just mist fans they make the liquid into a mist or wet fog which is heavy and cannot travel to every corner of the room.

2. It doesn't leave any residue

Usually the fogger machines leave a white/yellow residue which is harmful for the OT equipment and environment. Since there is no residue there is no corrosion and there is no resistance the germs create towards the disinfectant.

3. It sprays "dry fog"

There will be no moisture in the Operation Theatre after the spray.

The fogging machines result in moisture in the OT which is harmful for the equipment and humans working in those conditions.

4. It needs only 30 minutes of contact time. Therefore, it saves a lot of time and very useful between the surgeries, if need be.

Conventional fogging requires long closure times usually 3-4 hours.

5. Eliminates Bacteria, Virus, Fungi and Spores as well.

Covers entire spectrum of pathogens. The pathogens do not create any resistance towards the medicine because it leaves no residue at all.

Lawshana

6. It is very safe for people using the machine.

The fumes made by other fogging machines are carcinogenic for the people inhaling it. Also, there is no discomfort in the eyes or throat when you enter the OT after the 30 minutes of contact time.

7. Aldehyde compounds often used in foggers have been banned in USA, UK and Europe since a long time.

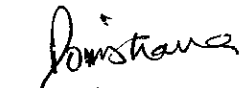

Hydrogen Peroxide is being used all over now. Even the most premier institute in the country AllMS, New Delhi is using Hydrogen Peroxide Solution since a very long time.

Sl.No.	Model and detail specifications	Offer Rate (in ₹)
1	NOCOSPRAY – Disinfection of upto 500 m ³ volume in less than one hour	3,80,000:00
2	NOCOLYSE 6% (1 Litre) – Bactericidal, Fungicidal, Sporicidal & Virucidal action	2,725:00
3	NOCOLYSE 6% (20 Litre) – Bactericidal, Fungicidal, Sporicidal & Virucidal action	30,495.00

We hope you will find our enclosed offer suitable and will favour us with your valuable order. However for any clarifications, please feel free to get in touch with us.

I look forward to hearing from you.

Sincerely Yours,

Romi Sharma

RUE S CRETEIL 448 374 253

Technical Specifications for NOCOSPRAY DISINFECTION EQUIPMENT:

1. Nocospray has a heating and ionizing turbine which increases the efficacy of the product (Nocolyse).
2. Sprays "dry fog" at speed of 80 m/s at 37 Degree Celsius
3. Dry Fog ensures slow and perfectly uniform sedimentation on each square cm of treated area.
4. 1100 Watt electrical turbine rotation on 22000 RPM
5. Stain proof as well as fire extinction hood
6. Only 1 ml Nocolyse per 1 cubic meter volume
7. Eliminates BACTERIA, FUNGUS, VIRUS & SPORES.
8. Mist projection with Venturi effect up to 15 meters (50 feet) from the appliance.
9. Non-corrosive to any kind of material - plastics, steel, etc
10. No residue is left after the treatment. The operating room is ready to be used.
11. Bio-degradable to the level of 99.9%
12. Only 3 minutes of spray time for 50 cubic meter volume (1765 cubic feet)
13. Only 30 minutes of contact time for reaching optimum level of efficacy.
14. Germs/Pathogens do not create resistance towards the medicine (Nocolyse).
15. Can treat up to volume of 500 cubic meters (17650 cubic feet) with one machine.

16. Delayed start and automatic stop.
17. Weighs only 5.8 Kg and is easily movable
18. Manufactured in accordance to ISO 9001 standards.
19. European CE certified
