Phone No. 0361 – 2733339

No. 246/IS/NIM/2016

Date: 9th Mar, 2016.

To

The Director
RIMS, Imphal.

Through
Dr. A. Barindra Sharma
Prof. & HOD
Department of IHBT
RIMS.

Subject: - Procurement of FULLY AUTOMATED 4 PLATE ELISA PROCESSOR.

Dear Madam,

With due regards, I would like to submit you the proposal for the procurement Fully Automated Analyser for hospital use which is a proprietary product. I here enclosed the following for your kind perusal:

1. Product specification
2. Proprietary certificate
3. Authorisation letter
4. Installation list
5. Rate quotation
6. Terms and condition.

Thanking you.

Regards.

For, NIM Pharmaceuticals

NIM PHARMACEUTICALS

(Authorised Signatory)
Authorised Signatory

Delta Biologicals

A Subsidiary of Erba Diagnostics, Inc.

Date: 08-03-2016

"PROPRIETARY CERTIFICATE"

This is to certify that we Delta Biologicals s.r.l - A Subsidiary of Erba Diagnostics, Inc., having factories at Via Nicaragua 12-14, 00040 POMEZIA (ROMA) ITALY, are the manufacturers of below mentioned machine details:

MACHINE MAKE: FULLY AUTOMATIC ANALYSER FOR ELISA, IFA, HEMAGGLUTINATION (I.E. TPHA) AND SERUM AGGLUTINATION (I.E. WIDAL-WRIGHT) TESTS
MODEL NAME: MAGO 4
COUNTRY OF ORIGIN - MADE IN ITALY

Delta Biologicals Srl

Dr Dorian Bravetti
General Manager

Date: - 08.03.2016

To,
The Director
Regional Institute of Medical Sciences
Imphal, Manipur - 795004

Sub:Authorisation

Dear Sir / Madam,

This is to certify that **M/s. NIM Pharmaceuticals, Guwahati, Assam**, is authorized to quote our Instrument, collect your valued order, raise invoice, supply the goods and collect payments for all our products on our behalf.

After sales & service will be provided by us.

Note: This Authorisation is valid upto 30th April 2016

Thanking you,

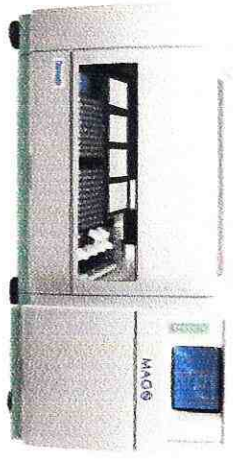

Yours faithfully,
For TRANSASIA BIO-MEDICALS LTD.

MAG^{4S}

Fully Automated 4 plate ELISA processor

TECHNICAL SPECIFICATIONS

Physical Specifications	Dimensions	4725 mm	3917 mm
	Length	2740 mm	2207 mm
	Height	2800 mm	2150 mm
	Weight	900 kg	
Power Supply	Voltage	100 - 240 V AC	
	Frequency	50 / 60 Hz	
	Current	5.5 A	
	Operational Temperature	18 - 30°C	
	Humidity	0 - 80% (Non-condensing)	
General Specifications	Wash cycle at 2000 rpm	Yes	
	Aspirate per plate	4	
	Number of ELISA plates	4	
	Sample capacity	120	
	Cups for pre dilution	120	
	Reagent capacity	8 Reagent bottles, 16 Reagent tubes	
	Reagent serial dilution	Yes	
Reader Specifications	Dynamic range	0.0 - 3.0 O.D.	
	Wash energy range	400 - 800 rpm	
	Fiber optics	8 x Optical	
	Light source	Mercury Lamp	
	Wavelength	365 nm	
	Reading speed	5 samples / min	
	Precision	± 0.5 % and ± 0.005 O.D at 1.5 O.D	
	Accuracy	± 1 % and ± 0.001 O.D at 1.5 O.D	
Washer Specifications	Mensural conductions	16 Inlets - 8 Aspirate & 8 Dispensing	
	Wash cycle	5.5 @ 200 ul	
	Medical volume	± 5 ul (1 ul in V wells, 0.1 - 3.0l)	
	Soak time	Programmable	
	Washer buffer capacity	12 x 8 L	
	Wash water container	1 x 2 L	
	Prints clean container	1 x 2 L	
Incubator Specifications	Number of incubators	4	
	Temperature range	37°C at RT	
	Temperature accuracy	± 1.2°C (range plus @ 37°C)	
	Incubator time	Programmable	
	Time to set temperature	< 8 min	
	Temperature monitoring	Yes	
Pipetting Specifications	Number of strokes	1	
	Multi-pipetting	Yes	
	Maximum Volume	3.00	
	Dispensing accuracy	± 4.00	
	Aspirating Accuracy	± 5.00 to 5.1 %	
	Aspirate Volume	200 µl	
	Minimum volume	100 µl	
	Max sample volume	350 µl	
Process Security	Liquid level sensing	Yes	
	Universal Portcaine System	Yes	
Software	Operating System	Multi-tasking Windows XP professional	
	USB interface	Yes	
	USB Port	Yes	
	Graphic based interface	Yes	
	Graphical well ID	Yes	
	Data processing	Yes	
	Multi password access	Yes	
	Ability to archive data	Yes	

Specifications are subject to change without prior notification.

Automation with.....Quality, speed, reliability & high throughput

- MAG^{4S} introduces a level of automation that is in a class by itself
- MAG^{4S} a true walk away system-Compact bench top model to perform all steps of ELISA
- Ability to perform multiple assays
- Fiber coated steel probe for dispensing samples and reagents
- Continuous probe clean- Maintained by internal hydraulic automatically.
- Multi-shot dispensing- Allows precise pipetting of small sample volumes.
- Liquid level sensing & mechanism reliability- Warning flag if reagent & sample is insufficient.
- Inbuilt independent incubation system for each plate
- 16 channel manifold with top of aspiration, no overflow
- Modular ELISA reader - Single & Dual wavelength reading
- Easy to use-Advanced graphic user interface with color coding process in each step of ELISA
- Unique graphic interface guides users at every step
- Installation base globally- Proven instrument technology from decades

Open system for ELISA:

- Erba Lisa **HIV Gen4**
- Erba Lisa **HCV Gen4 (v2)**
- Erba Lisa **HBs (LDR) MALARIA**
- Erba Lisa **Syphilis**

MACO Maximum flexibility for ELISA processing

Removable reagent rack to reduce setup time:

- MACO can test up to 120 patient specimens and report up to 364 results.
- One reagent rack is provided containing 60 positions, 8 positions for 60ml bottles & 56 positions for 5 ml test tubes
- Reagent rack is removable so that once loaded can be stored and reused in subsequent runs of the same type.

Probe with liquid sensing mechanism reliability:

- MACO uses the metallic probe to handle liquids.
- Can dispense reagents sequentially to 24 wells without stopping to refill
- Multi-shot dispensing minimizes assay dirty, ensuring consistent results across the plate

Probe cleaning to take care of carry over:

- The probe is internally coated with Teflon® which reduces the adhesion of substances to the surface
- Needle is automatically cleaned internally and externally with probe cleaning solution.
- Allows precise pipetting and dispensing accurately even at small sample volumes.

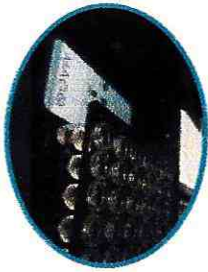

Internal ELISA Washer:

- MACO employs a unique 16 channel automatic well washer, which rapidly performs three wash cycles of each well within a trip.
- Multiport aspiration to achieve minimal residual volume
- ELISA washing with high efficiency

Incubator with assay temperature control and probe indicator panel:

- MACO has four plate block which is individually temperature control
- Maintains homogeneous temperature across the plate
- Dark protective cover protects samples, reagents and reactions from exposure to common environmental contaminations

Internal ELISA Reader:

- Measurement ranges: 0.000 - 3.000 O.D.
- Well length range: 400 to 800 nm
- Accuracy: ±1.5% and ±0.005 O.D. at 1.5 O.D.
- Precision: ±0.5% and ±0.005 O.D. at 1.5 O.D.
- Reading speed: 5 seconds per plate

Dedicated drawer:

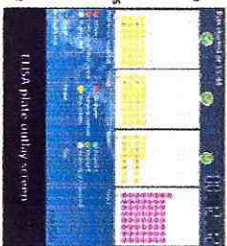

- A built-in compartment for high volume bottles
- There are two 2L bottles for wash solution, one 2L bottle for probe clean and one 2L bottle for waste collected from the wash manifold
- Separate built-in compartment for compressor and tubes

Each step can be viewed on the screen along with color change when the test is in progress

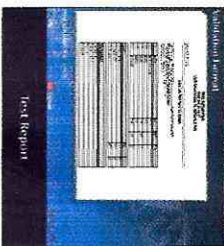

- ✓ MACO software application intended to execute diagnostic sessions
- ✓ User guiding operations (defining sessions, loading, handling liquids, unloading)
- ✓ Exchange data with the [HOST]

- ✓ Multilingual and intuitive software
- ✓ Preprogrammed assay protocols
- ✓ Self-check system
- ✓ Warning alarms
- ✓ Out of range flags
- ✓ Archiving / Downloading capability

- ✓ Custom/User Programmable channels
- ✓ Bidirectional US communication available
- ✓ Remote diagnosis capability
- ✓ Possibility to export results in excel format

Specification of Fully Automated Elisa Microplate System

1. CE approved Fully Automated Walkaway Microplate System of foreign make.
2. Sample capacity of at least 100 samples per Batch.
3. Software of latest origin (windows based operating system will be preferred).
4. Individual flexible sample racks for sample loading.
5. Multi tasking system (simultaneous functioning of different processing steps).
6. At least 4 microplate can be processed at a time.
7. At least 12 parameters per batch.
8. Assay optimization for faster throughput.
9. Triple detection technology for liquid handling (capacitance, Air pressure and colorimetric).
10. Minimum pipetting volume – 5 µl .
11. QC software inbuilt with software with Westguard Rules.
12. Clot detection must be present.
13. Flexible reagent vial loading with adapters.
14. Probe system should be such that probe crash do not occur.
15. Sophisticated Robotic arms for sample/reagent dispenser and for microplate transporter.
16. Carbonized disposable tips for reagent and sample dispensing.
17. Primary tube sampling.
18. At least 72 position for pre dilution tubes and at least 192 positions for plate dilution.
19. On board capacity of at least 100 samples/ 190 tips.
20. Inbuilt automatic sample bar code reader.
21. Unlimited sample dilutions.
22. Option for plate dilution, Intip dilution and Tube dilution.
23. At least 8 positions for reagents and at least 16 positions for calibrators/controls.
24. At least 8 channel washer manifold with cross well aspiration.
25. Plate Reader with Bichromatic and Monochromatic reading options with 4 filters and 2 optional.
26. Spectrophotometric reading range upto 3.0 OD.
27. At least 2 incubators with temp options for RT to 47° C and 3 incubators at RT.
28. Bi-directional interface and integration with existing LIMS at the cost of vendor.
29. On line UPS of 4 KVA must be supplied with the instrument.
30. Start uptime – less than 10 minutes.
31. Option for performing individual modular functions (washing, reading, incubation and sample addition).
32. Pipetting precision – lass than 6% CV at 20 µl and less than 2% at 100 µl.
33. Accuracy – less than 10% at 20 µl and less than 3% at 100 µl.
