Academic Activities:**A. FACULTY DEVELOPMENT PROGRAM**

1. The Medical Education Unit conducts monthly interaction programs for faculty members, organized by the Dean's Office, to enhance the quality of teaching.
2. Six faculty members from the Medical Education Unit and Curriculum Committee were deputed to the NMC Regional Center at NEIGRIHMS, Shillong, to undergo the Basic Course in Medical Education (BCME) and the Curriculum Implementation Support Programme (CISP).

B. CBME and FOUNDATION COURSE

1. Arrangements were made for the proper implementation of CBME as per the NMC guidelines by organizing Curriculum and Curriculum Sub Committee meetings.
2. The classes for the fresh batch of MBBS started on October 14, 2024. The first week of the Foundation Course of this batch was organized by the Dean's Office. Several resource persons were invited to share their knowledge and expertise. The White Coat ceremony for these students was also organized.
After this, the rest of the course was entrusted to a coordinator nominated by Phase I MBBS departments.
3. Areas of Elective Posting as per the NMC guidelines were prepared in consultation with the Heads of Departments. The MBBS Phase III Pt 1 (2019) Batch underwent the Block 1 and Block 2 elective postings under the supervision of the Dean's Office.

C. COUNSELLING AND ADMISSION OF STUDENTS

1. The selection test for admission into the M. Phil course was conducted by the Dean's Office on June 23, 2024. Six students were selected through the entrance examination.
2. Counselling of students for admission into undergraduate (Open and EWS categories), and postgraduate courses based on the NEET ranking, and for BSc MRIT and MLT based on 12 standard marks, were also carried out.

D. DISTRICT RESIDENCY PROGRAM (DRP) POSTING

For smooth implementation of the District Residency Program of NMC of the postgraduate students, the Dean's Office nominated a Nodal Officer of the institute and held a series of meetings with the State Health Authority. A series of discussions and communication were also made with the State Health authorities of the northeastern region to formulate the best way of instituting the DRP in their respective states. However, the unrest in the state since May 2023 hit the implementation of the program as soon as it started. The Dean's Office in collaboration with the State Health Authority made arrangements for bringing back the residents to safer areas. The postings were reshuffled, and the residents were reallocated to safer centres, and DRP has been going on smoothly since then.

E. ASSESSMENT BY REGULATORY BODIES

The arrangements for the NMC inspection of various Broad Specialty and Super-specialty Departments were coordinated by the Dean's Office in collaboration with the respective departments. Proposals for the conversion of two DCP seats into MD Pathology, and for the increase of MCh seats in Plastic Surgery and Urology, were also submitted by the Dean's Office.

F. TRAINING PROGRAMS FOR POSTGRADUATE STUDENTS

The Dean's Office organized a four-day training program on 'How to Write a Protocol' from January 17 to 20, 2024, for the newly admitted postgraduate and super-specialty students of the 2023 batch.

In compliance with NMC guidelines, the mandatory training program for postgraduate students on 'Ethics, Good Clinical Practice, Good Laboratory Practices, and Cardiac Life Support Skills (Basic Life Support and Advanced Life Support)' was conducted in multiple phases: June 10–14, 2024; June 24–28, 2024; July 2–6, 2024; July 15–19, 2024; July 23–27, 2024; and August 5–9, 2024.

G. THESES COMMITTEE MEETING

The Dean's Office Thesis Committee meetings to review and to approve the protocol of thesis of the newly admitted PG students on April 10, 2024.

H. MAINTENANCE OF THE ACADEMIC CALENDAR

The Dean's Office has been maintaining the academic calendar as per the prescribed schedule of the NMC by conducting University examinations for undergraduate as well as postgraduate courses in time despite the turmoil in the state. The institute has also been in touch with different stakeholders - the MoHFW, Government of India as well as Government of Manipur, Manipur University, other medical colleges and affected students, to take up measures for a teaching-learning program including assessments for the displaced students without insupportable compromise.

I. OTHER ACTIVITIES**RIMSAM**

RIMSAM, the Annual Meet of the Institute, was organized successfully from **April 22 to April 26, 2024**. All the faculty members of the institute – medical, dental and nursing were assigned houses (teams) for the first time in the history of RIMS. All the students and faculty members participated with enthusiasm.

FRESHERS' MEET

The Freshers' meet for the new batch of undergraduate students of all the streams of the 2023 batch was organized on November 2023 with the Director, RIMS as the Chief guest at the Jubille Hall, RIMS.

ANTI-RAGGING WEEK

As part of the All-India Council for Technical Education (AICTE)'s observance of Anti-Ragging Week, the institute participated in the campaign from August 12 to 18, 2024. 10. Details of major equipments installed in the Department /Unit:

Sl. No.	Name of equipment/faculty	A brief description	Uses
1	Binocular research Microscope 2 nos.	Euromax, pathological & Research as per IS:4381 & IS 5204	UG & PG Practical teaching
2	ELISA Reader EIAQUANT batch: EQ081733, - 2 nos.	It uses high optical system and sophisticated embedded computer control technology which enables the user reliable measurement and data analysis with minimum maintenance.	Patient care and PG practical
3	ELISA Washer Batch-1 i) EW-030218 - 2 nos.	Elisa washer is designed to wash the micro wells as a part of ELISA testing process. The performance of the ELISA test kits and reliability in their test results depends heavily on a good quality ELISA Reader and washer being for performing the ELISA test	Patient care and PG practical
4	Electrolyte Analyzer "Sensa Core Medical Instrument Pvt. Ltd." – 3 nos.	It is a completely automated, microprocessor controlled and use the latest ISE technology not just they have a snap-in electrode design that can control the calibrator volumes that ensure economical operations	Patient care
5	Centrifuge REMI R8C- 3nos.	It is laboratory device that is used for the separation of fluids, liquid bases on density. Separation is achieved by spinning a vessel containing material at high speed the centrifuge force pushes heavier materials to the outside of the vessels	Patient care and PG & UG practical
6	Refrigerator-2 no.	It is usually designed with multiple drawers and tiers. In this category, side by side models can often feature more freezer space than other configuration	To store blood samples and reagents
7	Hot Air Oven-4 no.	It is type of lab testing instrument that is used to heat up the products at a uniform temperature. A hot air oven is used to sterilize the product in a particular period of time under specific conditions like humidity, pressure and other environmental facilities	Patient care and PG research & practical
8	Spectrophotometer-1 no.	It is an instrument to measure the amount of light that a sample	PG and UG Practical

		absorbs. The spectrophotometer works by passing a light beam, through a sample to measure the light intensity of a sample	
9	Semi Autoanalyzer- 5 nos. (cliniQuent TM)	It is a compact, stand- alone, bench top analyzer designed for mid-sized labs. Ease of the operation with accurate and precise assay results, makes it the ideal choice.	Patient care
10	VitrosECiQ- 1 no.	The VitrosECiQ system provides a broad menu of routine and specialty testing to help in achieved fast, high-quality results. The VitrosECiQ system offers yhe lab a comprehensive menu of routine and especially immunodiagnostic testing, with a throughput of up to 90 test per hour in a compact footprint	Patient care
11	Deep freezer- 1 no.	Deep freezer is used to preserve and store blood sample, reagents for a long period of time.	To store blood samples and reagents
12	Fully Automated Analyzer Beckman AU 480) 1 no	The AU 480 is a clinical Chemistry analyzer for low-mid- volume, hospitals and laboratories or dedicated specialty chemistry or STAT analyzer for large laboratories	Patient care
13	Fully Automated Analyzer (Beckman DXc700AU) – 1 No.	Designed to meet the needs of mid to high volume clinical laboratories, the DXC 700AU reduces the number of test- processing steps by 30% due to its intuitive user interface that allow operators to spend less time on daily task and more time producing the quality results and more time producing the quality results that empower better decision - making	Patient care
14	Automated Analyzer (Cobas e 411) – 1 No.	It is designed for both quantitative and qualitative in vitro assay determination for broad range of application (including anemia; bone, cardiac and tumor markers; critical care; fertility/hormones; maternal care; and infectious disease.	Patient care
15	Industrial refrigerator (Celfrost) – 4 Nos.	Celfrost FKG 1000S two door upright showcase cooler with temperature control between 2°C/2°C and 8°C/10°C. The locking mechanism locks the interior with a simple twist of the key and the trays	To store blood samples and reagents

		have drains in each corner for fast cooling and it is frost free.	
16	Fume cupboard/ Fume Hood- 1 no.	Fume hood is an enclosure which is used to remove fumes and air borne particles at the contamination source. It is a kind of fume ventilation system which prime work is to remove smoke, dust mist and chemical fumes and restrict the entry in the laboratory environment	For PG research works and practical
17	Incubator – 4 nos.	A laboratory incubator is a heated, insulated box used to grow and maintain microbiological or cell cultures. The incubator maintains optimal temperature, humidity and gaseous content of the atmosphere inside	Patient care & PG research works and Practical
18	High Performance Liquid Chromatography System (HPLC) – 1 no.	It is use to separate, identify, and quantify the components of a mixture. It involves passing a pressurized liquid solvent through a column filled with a stationary phase, which separates the components	Patient care & PG research works

10. Details of major equipment's / faculties installed in the Department / Unit during the year 2024 – 2025.

Sl. No	Name of equipment / faculty	A brief description	Uses
1	Gynaecological examination couch (5 nos.)	A gynaecological examination couch is a specialized piece of medical furniture designed for gynaecological examinations and procedures. It is designed to be comfortable for patients during examinations, with a foam mattress and potentially adjustable back rest	-Obstetric examinations in OPD and emergency -Ultrasound scans -Pelvic and vaginal examinations -Pap smear tests

			-Minor gynaecological procedures
2	Syringe infusion pump (5 nos.)	A syringe infusion pump is a medical device used to deliver fluids or medications precisely and consistently over a set period. It operated by using a motor-driven piston to push the plunger of a syringe, ensuring accurate and controlled delivery of the medication or fluid.	-Used in Labour room delivering oxytocin during labour and post-delivery. -Precises medication delivery to deliver small and accurate doses of drugs -Accurate dosing for newborns and children -Delivers continuous doses of critical drugs during surgery or in the ICU and HDU
3	CTG Fetal monitor (2 nos.)	A cardiotocograph (CTG) or electrical fetal monitor (EFM) is a device used to record the fetal heart rate and uterine contractions during pregnancy and labor. It helps healthcare professionals assess fetal well-being by monitoring these vital signs.	-Monitor Fetal Heart Rate (FHR) -Monitor Uterine Contractions -Detect Fetal Distress -Guide Labor Decisions -Monitor High-Risk Pregnancies -Assess Fetal Health Before Labor (Non-Stress Test)
4	Electro cautery machine (2 nos.)	An electrocautery machine is a medical device used to cut tissue, destroy abnormal growths, or control bleeding during surgical procedures by applying heat generated by electric current. The machine passes a high frequency electric current through a metal probe or electrode. When this heated probe touches the tissue, it either: Burns or destroys the tissue (called coagulation) or cuts through the tissue (called cutting or dissection)	-Cut tissues and control bleeding during open and laparoscopic surgeries minor surgeries where cutting of tissue and control of bleeding is required. -Stopping bleeding (hemostasis) -Removing warts or tumors -Cutting tissue in surgery Preventing infection by sealing blood vessels
5	Delivery bed monitorised (2 nos.)	A monitorised delivery bed (also called a labor bed or obstetric bed) is a specially designed hospital bed used during labor, childbirth and post-delivery recovery. It comes with built-in monitoring and adjustment systems to ensure the comfort of the mother and safety of both mother and baby. It has adjustable backrest leg and foot sections can be moved to various positions to support different stages of labor and delivery. Helps the mother sit up, lie flat or assume delivery positions.	-Labor support: Allows mother to rest comfortably and helps in reducing pain and fatigue -Normal and assisted and instrumental delivery -Monitoring mother and baby. Quickly adjustable for emergency positions like Trendelenburg (head down) or CPR -Can be used after delivery for the mother to rest and recover -Easier to move the patient without shifting her from one bed to another
6	Vessel Sealer (2 nos.)	A vessel sealer is a modern surgical instrument used to seal blood vessels and	-Laparoscopic surgeries both in General Surgery and gynae

		<p>tissues during surgery using heat and pressure. It helps to stop bleeding without the need for traditional stitches or clips.</p> <p>The vessel sealer uses bipolar energy (electric current passed between two tips) to grasp the blood vessel or tissue, apply heat to melt the proteins (like collagen and elastin) and seal the vessel walls shut under pressure seal blood vessels and soft tissue</p> <p>Sealing blood vessels by sealing vessels up to 7 mm in diameter without sutures or clips</p> <p>Have a built-in blade that allows surgeons to cut and seal tissue in a single step Minimizing blood loss.</p>	<p>like gallbladder removal or hernia repair, Hysterectomy (removal of uterus), removal of ovarian cysts</p> <p>-General surgery: Bowel resection (cutting and joining intestines) & Appendectomy</p> <p>-Urological Surgery: Prostate or kidney operations</p> <p>-Thoracic surgery: Lung surgeries where blood vessels need sealing</p>
7	Ultrasonic Dissection System (2 nos.)	<p>An ultrasonic dissection system is an advanced surgical instrument used to cut and coagulate (seal) tissue at the same time using ultrasonic (high frequency sound) vibrations. The system uses a handpiece with a metal blade or tip that vibrates at a very high frequency. These vibrations cut tissue precisely through mechanical energy and seal small blood vessels by generating frictional heat, which causes proteins in the tissue to denature and seal.</p>	<p>Commonly used in minimally invasive and open surgeries.</p> <p>-Laparoscopic surgeries (eg. Gallbladder, hernia, appendix)</p> <p>-Gynaecological procedures (eg. Hysterectomy, ovarian cyst removal)</p> <p>-Thyroid and neck surgeries</p> <p>-Colorectal surgeries</p> <p>-Urological surgeries</p> <p>Cancer surgeries (precise tumor removal with minimal bleeding)</p>
8	Portable OT Light (1 no.)	<p>A portable OT light (Operating Theatre light) is a movable surgical light used to provide bright, focused illumination during medical examinations, minor procedures or surgeries. Unlike fixed OT lights, its can be easily moved and adjusted as needed.</p> <p>It is mounted on wheels for easy movement between rooms.</p> <p>Can be used un emergency rooms or field settings.</p>	<p>-Minor surgical procedures</p> <p>-Emergency surgeries or field operations</p> <p>-Medical camps and mobile clinics</p> <p>-Backup light in case of failure of main OT lights</p> <p>-Examinations and wound dressing</p>

Opinion of the Comptroller & Auditor General of India on the Accounts of Regional Institute of Medical Sciences, Imphal for the year ended 31 March 2025

Opinion

We have audited the financial statements of Regional Institute of Medical Sciences, Manipur, which comprise the statement of financial position as at 31 March 2025 and the Income & Expenditure Account/ Receipts & Payment Account for the year then ended, and notes to the financial statements, including a summary of significant accounting policies under Section 20 (1) of the Comptroller & Auditor General's (Duties, Powers & Conditions of Service) Act, 1971 read with Rule 17 (ii) of the Rules and Regulations of Regional Institute of Medical Sciences.

This Audit Report contains the comments of the Comptroller & Auditor General of India (CAG) on the accounting treatment only with regard to classification, conformity with the best accounting practices, accounting standards, disclosure norms, *etc.* Audit observations on financial transactions regarding compliance with the Law, Rules and Regulations (Propriety & Regularity) and efficiency cum performance aspects, *etc.*, if any, are reported through inspection reports/ CAG's audit reports separately.

In our opinion, except for the effects of the matter described in the Basis for Qualified Opinion section of our report, the accompanying financial statements of Regional Institute of Medical Sciences, Manipur, read together with the accounting policies and Notes thereon and other matters mentioned in the Separate Audit Report, which follows, **give a true and fair view** of the financial position of the autonomous body as at March 31, 2025, and (of) its financial performance and its cash flows for the year then ended in accordance with uniform format of accounts/format applicable to the AB/accounting standards generally accepted in India.

Basis for Opinion

We conducted our audit in accordance with the CAG's auditing regulations/standards/manuals/guidelines/guidance-notes/orders/circulars *etc.* Our responsibilities are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the autonomous body in accordance with ethical requirements that are relevant to our audit of the financial statements, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion

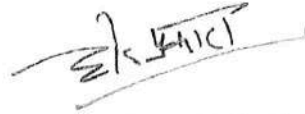

Responsibilities of Management for the financial statements

The Governing Body of Regional Institute of Medical Sciences, Manipur is responsible for the preparation and fair presentation of the financial statements in accordance with uniform format of accounts/format applicable to the AB/accounting standards generally accepted in India, and for internal control as management determines it necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion in accordance with CAG's auditing regulations/standards/manuals/guidelines/guidance-notes/orders/circulars *etc.*
