No. C/45/80-MC (I):

Imphal, the 14<sup>th</sup> January, 2026

**C I R C U L A R**

With reference to the communication received from the National Medical Library (NML), New Delhi, vide email dated 13th January 2026, it is informed that the usage of the Access Medicine Database made available to RIMS, Imphal has been reported to be considerably low.

The National Medical Library has strongly directed the institution to take immediate and effective measures to enhance the utilization of this valuable academic resource. The Access Medicine database is a comprehensive platform intended to support teaching, learning, clinical reference, research activities, and examination preparation.

In this regard, all faculty members, students, research scholars, and staff of RIMS are hereby strongly advised to actively register and regularly use the Access Medicine online database and other e-resources available under the NML-ERMED Consortium.

For registration and user awareness, all concerned users are requested to visit the Central Library, RIMS, at the earliest.

The National Medical Library has further clearly intimated that in the absence of substantial improvement in usage, access to the Access Medicine database will be discontinued in the coming year and reallocated to another institution.

In view of the above, all concerned are urgently requested to take this matter with utmost seriousness and priority and ensure maximum utilization of the Access Medicine database and other subscribed e-resources. Failure to increase the number of active users may result in the loss of access to these essential academic databases in the forthcoming year.

This matter may be treated as urgent and of high priority.
